MORE PARKING IN LESS SPACE

DOUBLE STACKER

A simple solution to immediately double your parking capacity.

Our **Double Stacker** is designed for fast and easy installation. This model is capable of parking SUVs on the ground and upper platform, and can handle **over 3,000kgs**. Operation is done manually by an individual hydraulic power unit, or a master power unit supply, capable of operating up to 25 lifts at one time.

We Listen. We Respond. We Deliver.

Parkmatic designs, manufactures, services, and installs automated and mechanical parking systems. This technology is designed to combat the growing problem of efficiently managing automobiles in areas where congestion, zoning, and crime are problems, and land is scarce and expensive.

FEATURES AND BENEFITS

ENVIRONMENTALLY FRIENDLY
Less pollution, no exhaust fumes driving up and down aisles and ramps looking for a spot.

LOWER CONSTRUCTION COSTS
Less excavation costs and reduced floor slabs.

LAND SAVINGS
Automated parking systems use 30-70% less land than needed versus a conventional garage.

LOW MAINTENANCE
Operation costs are low and requires less energy to run, usually ~1kw per cycle time.

INCREASED RENTABLE AREAS
Gain back real estate for rentable areas or other amenities by only using half the space.

Car Storage Facility

422 Double Stackers

As new cars are brought in from overseas, they are stored here at a port until they are delivered to the dealerships. Parkmatic provided 422 Double Stackers, giving them 844 parking spaces.
